## BankIt

A **World Wide Web sequence submission tool** called **BankIt** is now available. Developed by GenBank with its collaborating databases EMBL and DDBJ, sequences are entered into GenBank, initially, and are routed immediately for inclusion in EMBL and DDBJ as well.

BankIt permits the user to enter sequence information, revisions, and biological annotation such as coding regions and mRNA features. BankIt then transform the entered data into **GenBank** format for the investigator's review via e-mail. When the record is complete, it is submitted directly to GenBank. GenBank will contact the user by e-mail with an accession number. Once the test phase is completed,

BankIt will automatically issue accession numbers.

NIH investigators can access **BankIt** through National Center for Biotechnology Information Web Home Page:

## E-Mail Addresses Speed Library Notices

NIH staff can receive rapid notification of requested books by providing the Library with an **e-mail address**. If the Library has an e-mail address in a staff member's computerized Library record, a message will appear in their e-mail box when a requested book is ready or a borrowed book is overdue.

Library cardholders can telephone in, or EMail ([circ@nih.gov](mailto:circ@nih.gov)) addresses, or bring them when renewing their Library cards.
